### **Wrapped Nursery Stock**

This catalog provides information concerning bare-root material only. However, C. R. Burr & Company is one of the oldest nurseries attractively root-wrapping Roses, Flowering Shrubs, Ornamentals and many other types of plants. We are one of the largest growers in the East, providing a wide line of wrapped material in various price groups so that the retail nurseryman and dealer can present a well-balanced offering to the trade. All plants are packaged in Peat Moss, which our experience has indicated is the best moisture-retaining agent for keeping the root system healthy.

Information as to the type of packages, prices and varieties wrapped may be had by writing our Manchester office.

**"Growing Since '98"**

**"Evergreen liners in the transplant beds. We will stick 150,000 cuttings this year."**

C. R. BURR & COMPANY has been "Growing Since '98" a complete line of hardy northern grown nursery stock, including Evergreens, Fruit Trees, Hedge Plants, Roses, Shade and Flowering Trees, Shrubs and Vines. We have 600 fertile acres under cultivation in the soil rich Connecticut Valley, famous for shade tobacco and many other agricultural products.

Although planting was somewhat delayed this past spring, the heavy rains got the plants off to a fine start, which one of the wettest Julys on record has helped produce a special growth. This is especially true of our flowering shrubs, which are all cut back in the field after their first or second year. With Burr shrubs, your customer will achieve an immediate effect.

Among the outstanding varieties available this year, are Euonymus Alatus and Euonymus Alatus Compacta, Forsythia Spring Glory, Spirea Macrothysa, French Hybrid Lilacs in excellent variety, and Weigelas. These Weigelas, incidentally, are the finest we have ever had. In view of their comparative scarcity, we think they are good property.

In addition, we have a wide range of shade and flowering trees for your selection. These include Norway, Schwedler, and Sugar Maple, Cut Leaf Weeping Birch, Pauls Scarlet Haw-thorn, Redbud, Flowering Crabs in variety, Purple Leaf Plum and an unusual novelty item a tree form Purple Fringe, or Smoke Tree.

Of special interest is our large selection of evergreens. Whether you need them for resale at your Sales Yard, for growing on or for landscape work, you will find what you need at Burr. We have Spreading and Upright Yew, Greek, Irish, Pfitzer and Savin Juniper, Pyramidal and Globe type Arbor Vitae, Black Hills, Colorado, Norway and White Spruce, and Canadian Hemlock, that invite comparison, with those grown anywhere. Next to their quality, we think you will agree, the best thing about Burr evergreens is their price.

The general outlook in the industry is a favorable one and we believe that demand will remain high so long as building maintains its present high level.

We are always glad to show visiting nurserymen around our farms and, through our warehouses. It has proved to be our best form of advertising and we hope that you will find it possible to visit us. Our Main Office is nine miles East of Hartford, Conn., near Routes 6, 15 and 44. We will meet you at Hartford or Springfield, Mass., if you let us know when or where you will arrive.

# Flowering Shrubs

Your shrubs from the Burr Nursery are cut back, transplanted field grown plants, two, three and more years old. They are produced in the famed Connecticut Valley renowned for its production of quality agricultural crops.

We welcome your inspection of these fine shrubs throughout the year either in the field or in our storage. The plants are propagated from both hardwood and softwood cuttings and rooted in our own greenhouses. All plants propagated from softwood are individually potted and carried in cold frames from September to May before being planted out and grown on for two or three years. Plants propagated from hardwood are lined out under irrigation and carried from spring to fall, at which time they are placed in cold storage. The following spring the plants are lined out again and grown on for two or three years.

In the field the shrubs are grown in well spaced rows, which are fertilized and cultivated to the exact extent required to assure you a healthy, hardy, thrifty ornamental. All Burr shrubs are cut back in the field to develop a heavier branched top and a more vigorous root system.

# Fruit Trees

Choice northern-grown fruit trees have been one of the featured items at Burr's for many years. As New England's largest fruit-tree growers, we are confident that your requirements will be satisfied here. All trees are grown by the most modern methods and all are graded to the standards of the American Association of Nurserymen.

The inspectors of the Massachusetts Fruit Growers Association offer inspection service for trueness-to-name and are regularly employed to inspect Burr blocks of fruit trees. The certificate issued to C. R. Burr & Co., Inc., as of August 26, 1953, reads as follows:

"All of the apple, pear, plum, and one-year sweet cherry varieties propagated and now growing at the nurseries of C. R. Burr & Co. Inc., Manchester, Connecticut have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

(Signed) A. P. French"

## Height and Caliper

Height given of fruit trees is approximate and represents average height of most varieties. Some small growing kinds may fall short of height specified as it is intended that the caliper shall govern.
